

Update with Git

In this approach, we will update our projects with Git to reduce uncertain issues on script updates.

In this way, we can come up with.

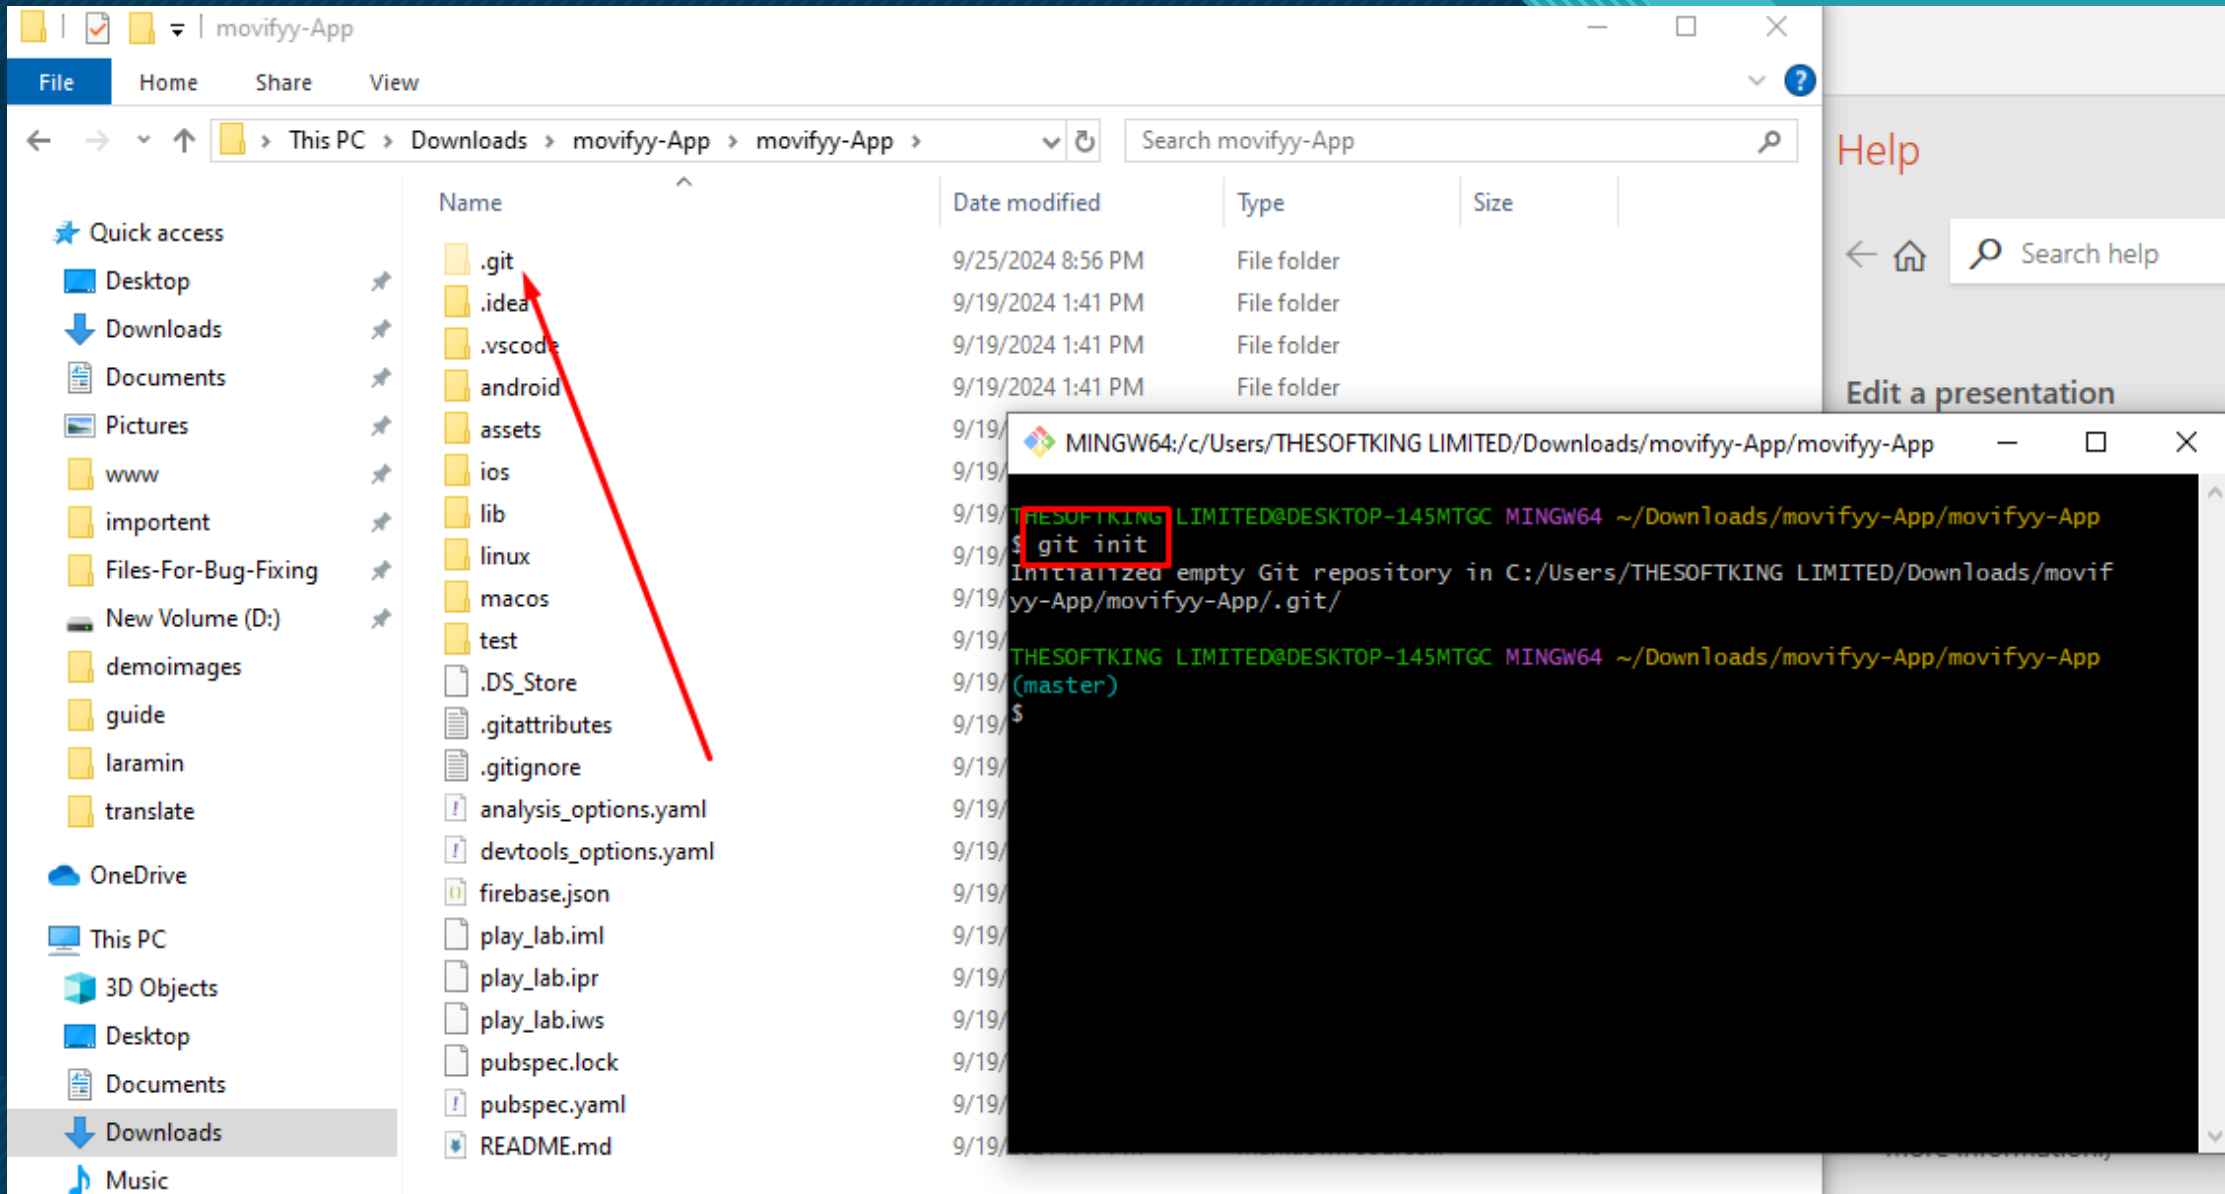

- Identify where we made the changes while updating.
- Identify Unexpected Letters or Words.
- Be sure what has been done in the updating process.
- Track Uncompleted features or updates.
- Reduce Unexpected errors.

Required Apps

Initialize git

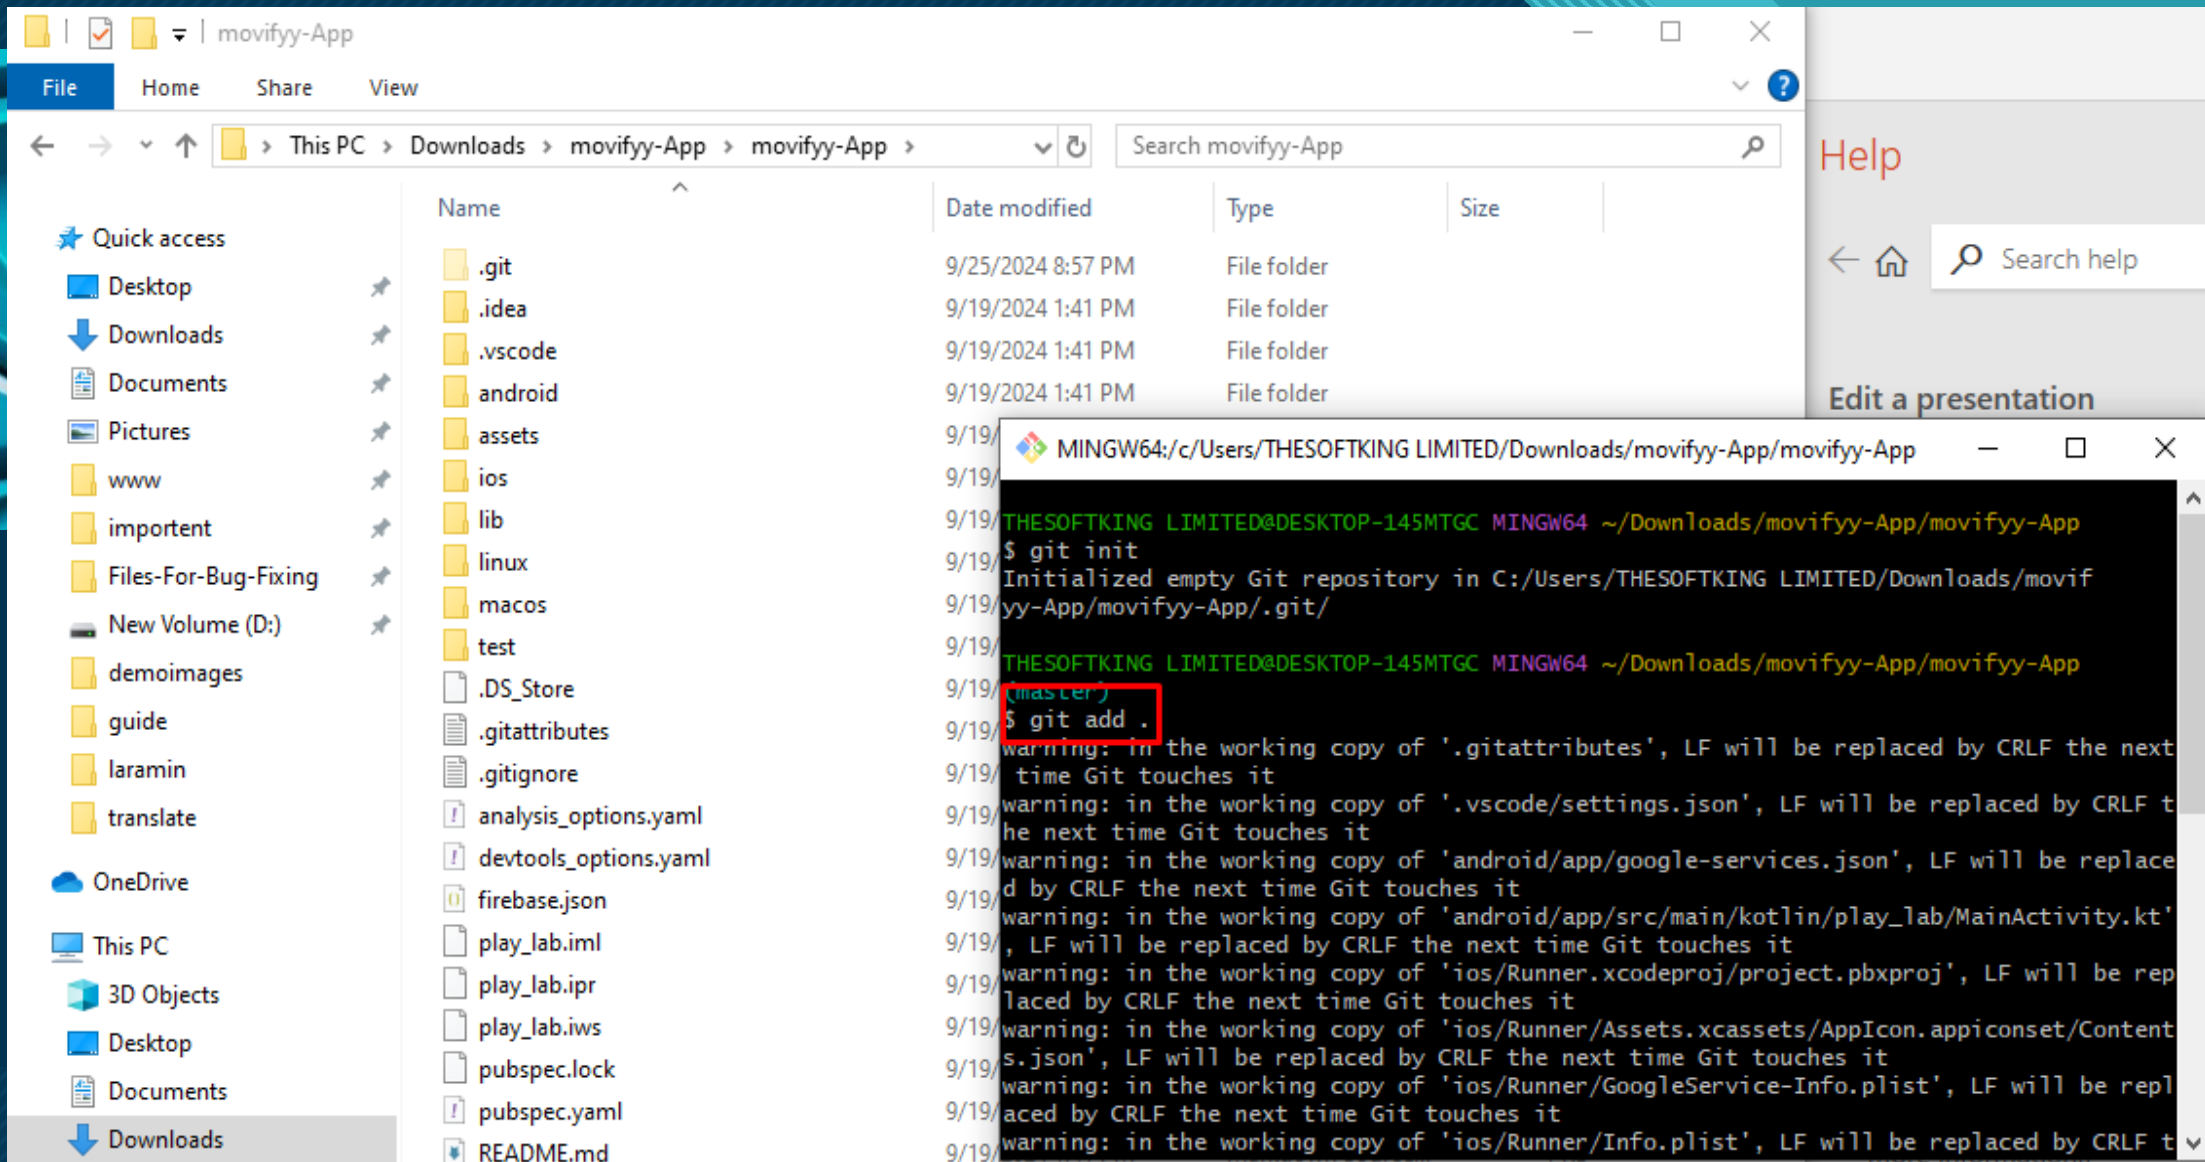

The screenshot displays a Windows File Explorer window titled 'movifyy-App'. The address bar shows the path 'This PC > Downloads > movifyy-App > movifyy-App'. The left sidebar shows 'Quick access' with 'Downloads' selected. The main pane lists files and folders, including '.git', '.idea', '.vscode', 'android', 'assets', 'ios', 'lib', 'linux', 'macos', 'test', '.DS_Store', '.gitattributes', '.gitignore', 'analysis_options.yaml', 'devtools_options.yaml', 'firebase.json', 'play_lab.iml', 'play_lab.ipr', 'play_lab.iws', 'pubspec.lock', 'pubspec.yaml', and 'README.md'. A red arrow points to the '.git' folder. An inset terminal window titled 'MINGW64:/c/Users/THESOFTKING LIMITED/Downloads/movifyy-App/movifyy-App' shows the command 'git init' being executed, with the output 'Initialized empty Git repository in C:/Users/THESOFTKING LIMITED/Downloads/movifyy-App/movifyy-App/.git/'.

Stage the initial file

The screenshot shows a Windows File Explorer window titled 'movifyy-App' with the address bar showing 'This PC > Downloads > movifyy-App > movifyy-App'. The left sidebar shows 'Quick access' with links to Desktop, Downloads, Documents, Pictures, www, important, Files-For-Bug-Fixing, New Volume (D:), demoimages, guide, laramin, translate, OneDrive, This PC, 3D Objects, Desktop, Documents, and Downloads. The main pane shows a list of files and folders:

Name	Date modified	Type	Size
.git	9/25/2024 8:57 PM	File folder	
.idea	9/19/2024 1:41 PM	File folder	
.vscode	9/19/2024 1:41 PM	File folder	
android	9/19/2024 1:41 PM	File folder

```

Create an initial commit. And it's done...

The image shows a Windows File Explorer window and a terminal window. The File Explorer window displays the contents of the 'movifyy-App' folder, including subfolders like '.git', '.idea', '.vscode', 'android', 'assets', 'ios', 'lib', 'linux', 'macos', and 'test', as well as files like '.DS_Store', '.gitattributes', '.gitignore', 'analysis_options.yaml', 'devtools_options.yaml', 'firebase.json', 'play_lab.iml', 'play_lab.ipr', 'play_lab.iws', 'pubspec.lock', 'pubspec.yaml', and 'README.md'.

The terminal window shows the output of a Git command, indicating that an initial commit has been created. The command executed is `git commit -m "initial commit before update"`, which is highlighted with a red box. The output shows that 539 files were changed, with 45100 insertions, and that the initial commit was created with mode 100644.

create mode 100644 .gitignore
```

Now git will watch every modification you have done.

After all the work you can stage it all like this.

The image shows a Windows File Explorer window with the left sidebar displaying 'Quick access' and 'This PC' sections. The main pane shows a directory listing for 'd:/project-rent-manager/rent_manager'. The files and folders listed are:

Name	Date modified	Type	Size
.dart_tool	9/14/2024 4:35 PM	File folder	
.git	9/25/2024 9:06 PM	File folder	
.idea	8/19/2024 4:40 PM	File folder	
android		File folder	
build		File folder	
ios		File folder	
lib		File folder	
linux		File folder	
macos		File folder	
ss		File folder	
test		File folder	
web		File folder	
windows		File folder	
.flutter-plugins		File folder	
.flutter-plugins-dependencies		File folder	
.gitignore		File folder
